### Program: Introduction to Insulating Glass

**Length:** 1 hour  
**Credits:** 1 LU  
**HSW/Sustainability:** Yes  

**Description:** The demand for energy savings, building occupancy safety and comfort have enabled the glass and glazing industry to bring many innovations to market. This course will cover the basic components of insulating glass and review some of the key performance attributes they provide.

**Learning Objectives:**
- Gain an understanding of the four primary benefits of insulating glass
- Identify the primary components of an insulating glass unit and understand their purpose
- Understand the orientation terminology of an insulating glass unit
- Identify the various types of insulating glass construction

**A/V Needs:** Electrical power, screen and computer projector for the PowerPoint presentation. (The CES facilitator supplies the laptop and laser pointer.)

**How Taught:** The CES facilitator utilizes a PowerPoint presentation to provide an in-depth overview of what is decorative glazing, its uses and applications. The presentation concludes with an overview of additional educational resources and relevant test standards and specifications.

**Target Audience:** Architects, specifiers, owners and other design professionals in the commercial market. The ideal audience size can be one on one or over 50. The program meets every experience level with time designed into the program for questions and answers.

**Facilitator Qualifications:** All GANA CES facilitators have been trained on CES guidelines and presentation skills. In addition, the facilitators are individuals working within the commercial architectural glass industry, representing the Association.

**Costs:** There is no cost to bring this program into your firm or chapter meeting.
