

# The American Institute of Architects Continuing Education System

## AIA/CES Registered Provider Program Summary

**Provider:** National Glass Association

**Length:** 1 hour

**Program #:** LD0001

**Credits:** 1 LU Hour

**Program:** The Many Benefits of Laminated  
Glass in Architectural Design

**HSW/Sustainability:** Yes

**Description:** A study of the manufacturing process for laminated glass.

**How Taught:** The CES facilitator utilizes a PowerPoint presentation to offer a live presentation, allowing time for Q&A with the participants.

### Learning Objectives:

- Explain the process used to create laminated glass
- List three features of laminated glass
- Discuss the various security glazing standards
- Describe the benefits of hurricane glass in residential applications

**Target Audience:** Architects, specifiers, owners and other design professionals in the commercial market. The ideal audience size can be one on one or over 50. The program meets every experience level with time designed into the program for questions and answers.

**Target Audience:** Architects, specifiers, owners and other design professionals in the commercial market. The ideal audience size can be one on one or over 50. The program meets every experience level with time designed into the program for questions and answers.

**Facilitator Qualifications:** All NGA CES facilitators have signed the AIA speaker agreement. In addition, the facilitators are individuals working within the commercial architectural glass industry at member companies of the Association.

**Costs:** There is no cost to bring this program into your firm or chapter meeting.
