AIA/CES Registered Provider Program Summary

Provider: National Glass Association
Program #: FM0003
Program: The Value-Added Performance of Coated Glass

Length: 1 hour
Credits: 1 LU
HSW: Yes

Description: A study of the manufacturing process for coatings on glass, the performance values and a case study on cost savings.

Learning Objectives:
- List two reasons glass is coated
- Compare and contrast reflective and low-e coatings
- Understand the difference between VLT and UV
- Describe three cost-saving opportunities provided by coated glass

A/V Needs: Electrical power, screen and computer projector for the PowerPoint presentation. The CES facilitator supplies the laptop and laser pointer.

How Taught: The CES facilitator utilizes a PowerPoint presentation to offer a live presentation, allowing time for Q&A with the participants.

Target Audience: Architects, specifiers, owners and other design professionals in the commercial market. The ideal audience size can be one-on-one or over 50. The program meets every experience level with time designed into the program for questions and answers.

Facilitator Qualifications: All NGA CES facilitators have signed the AIA speaker agreement. In addition, the facilitators are individuals working within the commercial architectural glass industry at member companies of the Association.

Costs: There is no cost to bring this program into your firm or chapter meeting.
