1. Estimate based on global manufacturer reach and the extended network of dealers, contractors, and retailers accessing manufacturer-hosted portals powered by Cyncly Windows, Doors, and Glass products.

Smart Glazier Acquisition

How it fits with portfolio

Cyncly WDG + Smart Glazier

Combining with Smart Glazier creates a connected loop from field-to-factory-and-back

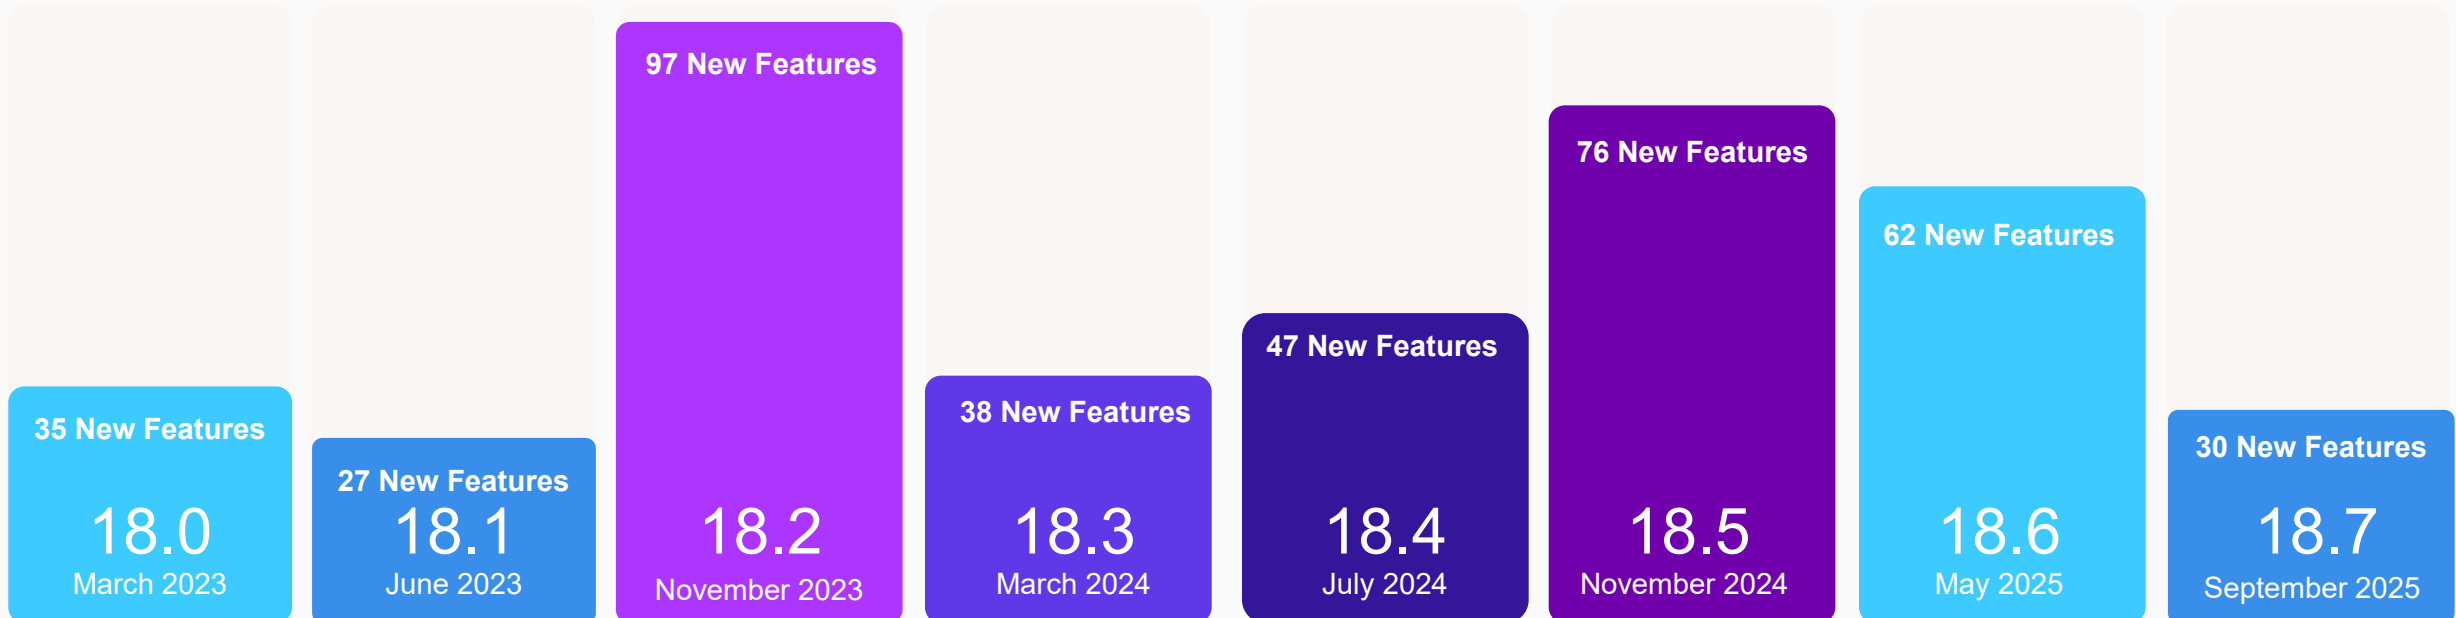

Recent InnovationITLE

Continuous Innovation

Every version release contains significant functionality improvements all focused on improving our customers' profitability, the service they offer and the efficiencies they can achieve.

Recent InnovationITLE

MOBILE TRACKING | FeneVision TRACKING add-on

Enable unit inquiry, acceptance and rejection, containerization, and plant location scanning directly from a browser based mobile application

What you gain

Increase shop floor visibility

Scale tracking to more locations throughout the facility by combining existing desktop Tracking stations with new mobile scan points. Capture production events closer to where work occurs, improving work-in-process visibility, status accuracy, and operational awareness.

Reduce non-value-added work

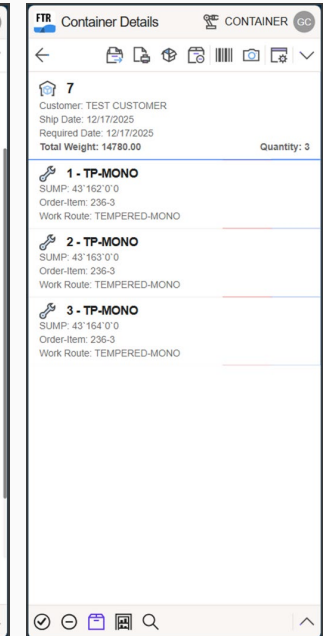

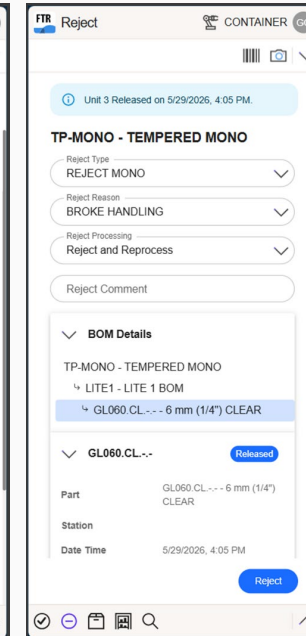

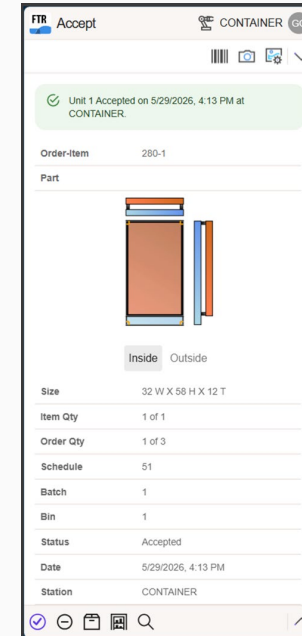

Expand tracking coverage to reduce lost material, manual tracking, and excess WIP. Better visibility helps teams find material faster, reduce remakes, and improve on-time delivery.

What it does

Browser-based mobile access

Essential tracking activities

Expanded production visibility
